DAS7

A giant leap forward in report design, analytics, data visualization and business intelligence. DAS7 is the new standard in self-service reporting. Our users are "regular people" who create stunning, robust and interactive dashboards in minutes without the need to contact IT.

Innately Intuitive

- Easy to learn and use
- Most calculations are a simple right-click
- Embed Excel into any report and leverage Excel skills
- Slice and dice data from multiple JDE tables and other data sources on one report
- Inherited JDE formatting and lookups

Interactive Dashboards

- Use any DAS7 report as a dashboard data source
- Build robust interactive dashboards in a simple drag and drop interface
- Combine multiple items in one dashboard: charts, pies, gauges, cards, maps, pivots, scatter plots, grids and much more
- Add drilldowns and/or interactivity with a few clicks

Data Access

- All JDE modules for one price
- Access all 5000 JDE tables and 8000 JDE business views
- Access custom tables and custom business views
- Write a report one time and access any JDE environment
- Connect to Excel and other databases to combine external and JDE data in a single report

Designed for regular people

Data Access Studio enables business users to easily create queries, operational reports and analytics. Together with Automator and Templates (prebuilt report bundles), DAS7 greatly alleviates the burden on IT resources and overall infrastructure.

- Quickly find data using table and column descriptions, or screen names in our intelligent search engine
- Easily format report columns, add calculations and filters, organize and summarize data
- Effortlessly save, share and distribute reports in multiple formats
