

Mobie® is a landmark technology for JD Edwards in the business intelligence landscape that eliminates complexity. For the first time, a fully automated BI stack is available to deliver visual narratives using telltale graphics for the navigation of any critical business decision-making situation.

Web-Centric

- Assemble and fashion dashboards for any business environment
- Access dashboards from any browser or device
- Construct slide shows by mixing and matching dashboards
- Engage with data using minimal IT resources
- Create hyperlinks between dashboards

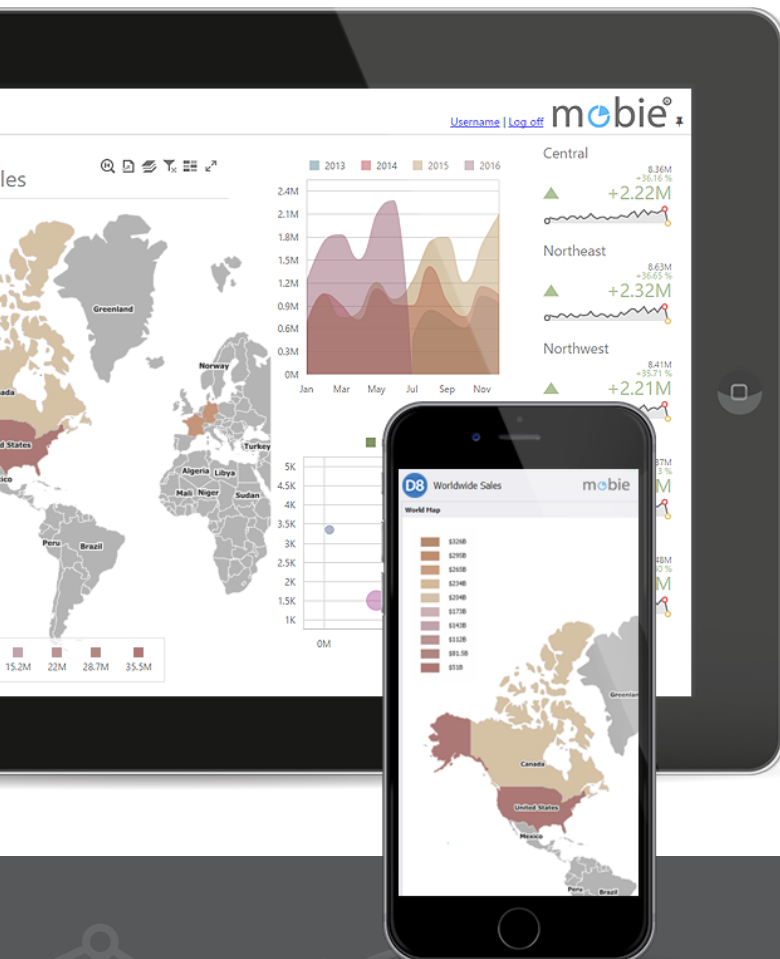

Dashboard Interactivity

- Centralize a myriad of data widgets into a single dashboard
- Interact with a touch-enabled display that uses intuitive charts and vibrant graphics
- Customize drill downs, utilize hover pop-ups, and administer layer-change actions
- Design schemes with intuitive drag-and-drop design

Subtle Yet Swift

- Index tables for no added strain to the JD Edwards system
- Build tables automatically into a speedy data warehouse
- Spotlight compelling data with no need for technical skills
- Repeatable execution with minimal administration
- Install in under 90 minutes

Uncover Hidden Narratives in Your JDE Data

Mobie® is mobile business intelligence for every type of enterprise application. Together with DAS8, mobie® empowers all user types to create stunning dashboards that logically answer the most robust business questions.

- A complete solution that extracts and assembles data for any professional need
- Format, transform, and index data from multiple sources into one luminous illustration
- Create perfectly optimized data warehouse tables in one click
- Go beyond grids to draw visual conclusions with multi-dimensional data slicing-and-dicing
