

Automator™

Manually generating and distributing reports is a time-consuming, error prone process. Improve the quality of distributed information and save time with Automator – the engine that allows you to schedule and distribute DAS reports. Expedite pertinent reports to necessary recipients, at precise times, with minimal effort.

Automatic Distribution

- Send Data Access Studio reports via email and file server
- Automatically send multiple versions of the same report to numerous, bespoke recipients
- Name files automatically to decrease cataloging efforts
- Personalize multiple documents distributed using mail merge
- Compress and encrypt distributions

Smart Enterprise Alerts

- Configure, customize, and create alerts to be automatically dispatched based upon user-defined criteria
- Define dynamic, event-based alert criteria for any type of business need
- Configure and customize alert criteria to adapt with ever-changing environments
- Receive alerts on any device

Streamlined Systems

- Schedule automations on any user-defined date, time, or frequency distributed on an Outlook-like interface
- Run long reports during non-business hours
- Concurrently execute multiple reports on multiple servers
- Pair with Microsoft Teams to define who receives what information

A Complete Suite to Disperse Mission-Critical Information

Lean on the security and dependability of Automator to perform DAS report distribution tasks for you, saving valuable time and providing critical information to those around you. Automatically schedule and deliver pertinent information to every corner of your enterprise.

- Create operational alerts such as equipment maintenance, low stock inventory, or work order requests
- Automate processes such as time entry reports, order acknowledgments, or balance on hand for vendors
- Empower users to become citizen developers
- Effortlessly segment and distribute reports to provide the right data, to the right people, at the right time
